Space heaters place high energy demands on a building and can be fire hazards.

Before you buy or deploy a space heater: First call Facilities Management to request a heating assessment.

If deemed necessary: Facilities Management will conduct an electrical evaluation to determine the appropriate size heater.

Only oil filled, radiator type portable space heaters with no exposed heating elements are allowed:

- Preferred: Low Energy
  - 400 W, 3.3 Amps
  - 1500 W, 12.5 Amps

- Not allowed

Space Heater Safety:

- Keep heater at least three feet away from combustible materials.
- Do not use an extension cord.
- Do not place the space heater under a desk or in another enclosed area.
- Turn off heater when room is unoccupied. Do not leave heater unattended.
