Acknowledgements

There are so many individuals and families who made this NICU parent orientation CD possible. We thank all the families who graciously donated photographs of their children and themselves, and for all those families who allowed us to photograph their children. In addition we are grateful for all the feedback and reviews from parents in the Family Advisory Council. Who also thank our professional photographers, Charles Manley and Marie Watson who captured so many of the beautiful moments pictured in this CD.

The development and production of this CD was made possible by the concerted efforts of three organizations: Children’s Medical Ventures, Anglersthree Multimedia and the Morgan Stanley Children’s Hospital of New York Presbyterian. This CD is a product of joining valuable resources which allowed taking a very good idea and making it a reality.

Each of you helped in making this CD more than we ever dreamed possible.
