Resident 'Moonlighting'

The Department of Pediatrics believes that the health and well being of its residents and optimal educational engagement cannot be achieved when residents 'moonlight'. It has been determined that the hour regulations do not allow ample opportunity for residents to 'moonlight' and remain in compliance with the hour regulations. Resident moonlighting is therefore not permitted. Residents may appeal this decision through an appropriate grievance procedure and in compliance with the New York City Health and Hospitals Corporation policy on Resident Moonlighting.
