Does your child have Cerebral Palsy?
Are they between the ages of 5 & 17 years old and over 45lbs?
Are they able to walk with or without an assistive device?
Does your child have stiff/spastic legs?

If yes, she/he may be eligible to participate in a research study involving Dysport® (Botulinum toxin) injections in the muscles of the lower limbs to improve energy consumption and walking efficiency.

If you are interested in finding out more information about the study, please contact:
